

Super TIGRE[®] ELECTRIC POWER

“The easy choice in affordable electric power systems”

Brushless Motors

Putting together the right power system should be easy and affordable — and that's what SuperTigre offers.

Simple choices make it fast and easy to find the best combo for your application. And since connectors are compatible and installed, installation and hookup are simple, too.

And like SuperTigre engines, each component is covered by a generous warranty — and designed to deliver the things modelers want most: long life; reliability; solid performance; and most of all, no-nonsense value.

- Designed for 7.4V and 11.1V (2-3S) use
- Mounts feature the same bolt pattern as other popular motor brands, including *ElectriFly™ RimFire™*
- All include mounts, templates and leads with gold-plated 3.5 mm bullet connectors
- 1-year limited warranty

Brushless .10 Motor (SUPG8050)

Best Paired With: 30A ESC; 1500-2100mAh LiPo Packs
